

ROLLSROLLER®
— FLATBED APPLICATOR —

let signs be made easy

ROLLSROLLER® pays for itself and ties in with your business concept

All companies that work with self-adhesive foil can benefit from using a ROLLSROLLER®. Almost 1,500 companies worldwide have already discovered this, and have made ROLLSROLLER® part of their business concept. The ROLLSROLLER® creates its own capital and pays for itself by doing the job in a third of a time required for manual application.

Here's an example:

The ROLLSROLLER® 540 is our most popular model. If you spread the investment for this applicator over 60 months, the cost is 420 €* per month, or 21 € per working day. If an operator costs 20 € per hour, the ROLLSROLLER® pays for itself if it's used just over one hour per working day. At www.rollroller.se, you'll find a calculator that works out exactly how much you save by investing in a ROLLSROLLER®.

More than time savings

But it's not just time savings that make ROLLSROLLER® your most profitable working partner.

The ROLLSROLLER® is used for all types self-adhesive foil applications, including banners, signs, road signs and markers, glass application, colouring of large areas and application on substrates up to six centimetres thick. Its uses are almost infinite.

Better results

The ROLLSROLLER® minimises waste and produces perfectly flat application without bubbles and creases – something that's stated as a sales argument by sign manufacturers who use the ROLLSROLLER®.

Improved operator ergonomics

Manual application on really big signs involves a lot of climbing and knee-bending. The ROLLSROLLER® gives you an ergonomic working position that spares your back and knees.

And if you choose a height-adjustable applicator, the benefits are even greater.

The ROLLSROLLER® is extremely user-friendly. Thanks to a detailed manual supplied on delivery, the operator can learn to use it in about an hour. The machine is fully assembled at the factory, and makes profits right from day one.

At www.rollroller.se, you can read comments from some customers who have already invested in a ROLLSROLLER®.

ROLLSROLLER® is compatible with all types of self-adhesive foil, including road signs.

"This machine rocks. We love it. Jobs that used to take an hour, we can now fix in ten minutes."

Prints Plus, USA

*Based on Swedish leasing costs.

Discover how easily and quickly you can improve your earnings

We show step-by-step how easily a single operator can apply designs to substrates with a ROLLSROLLER®. At www.rollroller.se, you can find films demonstrating other types of applications.

1. Place the sign material at the centre of the table

2. Place the design on the substrate.

3. Pressurise the roller to fix the foil into place.

4. Fold half of the foil over the roller.

5. Peel off the liner.

6. Trim the liner.

7. Fold the liner under the roller.

8. Apply half of the design using the roller.

9. Apply the other half using the pressurised roller.

10. The result: a smooth sign without creases or bubbles.

"We've got over 20 ROLLSROLLER®s today. That says a lot about the results."

Trond Aamodt, Euroskilt, Norway

"Jobs that used to take a week can now be done in a day."

Jonathan Cawthorn, Jon Signs, UK

Choose the right ROLLSROLLER®

To help everybody find the right ROLLSROLLER® for their needs, we've designed several standard models. The main difference between them is the size of the working area and the accessories included. The premium models are equipped with side pockets, media holders on the ends and lighting. The basic models do not have these accessories. However, you can buy the accessories for these models. The only function that can't be added to the basic models is height adjustment. For a complete list of accessories, see www.rollroller.se. If you have special requirements, we can customise a ROLLSROLLER® for you.

Consider the following factors when choosing your ROLLSROLLER®:

- What size signs do you mainly work with?
- What media widths do you work with?
- What width does your plotter or printer produce?
- How will your needs develop over time?

Answering these questions will help you choose the right ROLLSROLLER®. Start with the media width and sign width, then go on to the length.

Our best-selling model, the 540/170, suits most sign manufacturers' needs.

For complete technical data, see www.rollroller.se.

<i>Basic Model</i>	<i>Length of working area</i>	<i>Width of working area/roller width</i>
280/145b	2 500 mm/98 in	1 400 mm/55 in
340/145b	3 100 mm/122 in	1 400 mm/55 in
400/145b	3 700 mm/146 in	1 400 mm/55 in
400/170b	3 700 mm/146 in	1 630 mm/64 in
<i>Premium Model</i>	<i>Length of working area</i>	<i>Width of working area/roller width</i>
400/150	3 600 mm/141 in	1 400 mm/55 in
400/170	3 600 mm/141 in	1 630 mm/64 in
540/170	5 000 mm/196 in	1 630 mm/64 in
540/220	5 000 mm/196 in	2 050 mm/80 in
605/170	5 650 mm/222 in	1 630 mm/64 in
1080/170	10 400 mm/409 in	1 630 mm/64 in

Adapt your ROLLSROLLER® to your needs

Adjustable working height

Now you can adjust the height of your ROLLSROLLER®. This allows the ergonomic working height to be optimised for each operator. The height is easily adjusted with a button at the edge of the table.

Cleaning system

Our roller for cleaning the sign surface prior to application has a Teknek automatic cleaning station.

Quiet compressor

If you haven't got a permanent compressed air connection, you can use a compressor instead. Our compressor is hard-wearing and very quiet at just 45 db.

Media holder

The media holder is very useful for unrolling self-adhesive film, fabric, flexible substrate etc.

Double glide beams

Add an extra glide beam to create two work stations. (Applies to the ROLLSROLLER® 540 and longer models.) Palma Pub in France did this and tripled its productivity. Read more below.

More accessories

For a complete list of accessories for the ROLLSROLLER®, see www.rollroller.se

"The ROLLSROLLER® has completely changed our way of working."
Craig Westland, Centurion Signs, UK

"Thanks to the ROLLSROLLER® 605, we've tripled our productivity compared to traditional application techniques."
Bernard Palanque, Palma Pub SA, France
