

L/281.1

COLOUR

transparent matt

SERIES

TRUCK FILM

PRODUCT USE

Matt Transparent Cast Truck Film, specifically designed to laminate AP/280. Equipped with the exclusive APA-ColTruck/Ultra-P Plus adhesive, L/281.1 has been formulated to weld onto the surface of the AP/280 and with it resist the strains to which the PVC curtain are subjected. Thanks to the deep matt finish, the film is ideal to give images an elegant matt anti-glare appearance and provides excellent resistance to the elements. Elastic, conformable and does not shrivel up.

With an excellent mechanical and UV ray protection, L/281.1 is recommended to improve the durability of printed images onto APAPrint film listed in the section "Application" of this Technical Data Sheet.

STOCK AVAILABILITY

h. 122 cm: immediately available

h. 152 cm: available from the 1st week of July
